

CONSTRUCTION NOTICE

Bay Point Sewer Repairs Phase 4 Project No. 18119

August 2019 – March 2020

Delta Diablo (District) is your wastewater resource recovery service provider. We will soon commence work to improve sewer system performance and ensure continuous sewer service to residences and businesses in your area. Rehabilitation of sewer pipelines is a priority for the District to address structural defects, which may impact future reliability.

What's Being Done?

Sewer lines in your neighborhood need to be repaired to fix protruding service laterals, cracks, fractures, sags or offset joints. These repairs are important to ensure reliable service 24 hours a day, 365 days a year.

The sewer line repairs are being undertaken ahead of street paving work by Contra Costa County in Summer 2020 in the Bay Point area.

Where's the Work?

Please see attached map for locations. Sewer repair/replacement is designated by red line.

Questions or Concerns

What to Expect

During construction hours:

- *Access to private driveways will be maintained
- *Emergency vehicle access will be maintained
- *No full street closures - some traffic may be delayed
- *"No Parking" signs to be posted at least 3 days in advance
- * All usual parking restrictions will still be in effect during construction.

Your sewer service may be temporarily interrupted if work is to be performed on the sewer lateral pipe connection that serves your property. Our contractor will notify you in advance so you can plan accordingly. Sewer service typically will then be restored to your property within hours.

What's the Timeline?

Construction repairs are expected to begin in August 2019 and take approximately seven months, depending on weather, and be completed in March 2020. Construction in your area will not extend for this entire period.

Standard work hours are 7:30 a.m. - 5:00 p.m., Monday through Friday.

If there is construction work immediately in front of your home or business, you will also receive a notification from our construction contractor, Ranger Pipelines Inc., approximately one week prior to the start of work.
